

ICT & INTERNET ACCESS POLICY

Cefn Mawr has an internet access policy. We endorse the L.E.A. draft guidelines on the prevention of access to inappropriate material on the internet along with other ICT related aspects (see attached copy)

The use of ICT in raising standards in literacy and numeracy

| Software | Focus/Description of use |
|-----------------------|--|
| Granada tool kit | Paint, database, spreadsheet / writer |
| Microsoft office | Excel power point, publisher, word |
| Activ | Activ primary and active studio professional |
| Interactive resources | Maths packs 1-3/ Primary games 1-5 EY maths |
| Digital Blue | Movie creator |
| | |

The innovative use of ICT

We intend that the children will be able to use e-mail to exchange information with other schools in the UK and also to be able to use the internet to research topic and subject areas. Each class (apart from reception and nursery is fitted with interactive whiteboards

Teacher professional development.

We intend that teachers should use the internet both as a teaching tool and as a resource bank, for example using numerous sites. We intend that all teachers will have the opportunity to develop their personal computing skills.

ICT in school management and administration.

Cefn Mawr currently has a computer and a lap top for school administration purposes. Administrative staff are constantly being trained by the authority and are familiar with the software package that is used.

Staff training

All staff completed the Nof training and are competent in the use of ICT to support teaching and learning. There is an ongoing policy of keeping staff up to date with ICT related changes.
